# The Tierra Solution

Resolving Climate Change Through Monetary Transformation

By Frans C. Verhagen

Foreword by Felix Dodds

*"A visionary and immensely practical approach to reforming today's bubble finance and taming its global casino. Verhagen [...] illuminates the win-win solutions possible when we combine monetary transformation with low-carbon, renewable resource strategies and equitable approaches to sustainable development."*

*- Hazel Henderson, President of Ethical Markets Media, author and creator of The Green Transition Scoreboard®*

**A**s climate change continues to threaten the earth and as the global financial crisis lingers, governments and communities need to take charge of their own and global monetary systems. Sustainability sociologist Frans Verhagen proposes a solution—the Tierra Solution—to repair the present global monetary, financial, and economic systems that enrich the few, impoverish the many, and imperil the planet. Verhagen calls for transformational changes in order to advance climate-resilient economic development. The Tierra Solution proposes:

- A credit-based financial system governed by a Global Central Bank,
- A banking system without the privilege of money creation, and most importantly,
- A carbon standard for the international monetary system with the Tierra as the unit of account.

The Tierra Solution is an in-depth and thought-provoking read that shows an innovative path for global citizens who want to combat climate change, the economic crisis and poverty, and for public officials, economists, international development experts, and climate scientists who want to be part of an integrated solution to the dual challenges of climate change and financial crises.

**Frans C. Verhagen** is a sustainability sociologist with a Ph.D. in the sociology of international development from Columbia University. He founded the Queens Green Party, the Riverside Church Ecology Task Force, and the Ecolinguistics Commission. He has worked around the world and online teaching environmental policies and sustainability.

Dissecting Occupy Wall Street

By Danny Schechter

# dare to care

A Love-Based Foundation for Money and Finance

By Louis Böhlingk  
Foreword by Hazel Henderson

*"In my 25 years as an entrepreneur, there has been a rule to keep one's heart out of business decisions. Dare to Care boldly disrupts this rule with a vision of finance and economics that integrates heart and mind, left and right brain, and weaves hard economic facts with lyrical poetry. It highlights thriving businesses, banks, and non-profits which employ Care-First vs. Money-First as a long overdue pathway to true sustainability for all people of the world." - Leslie Danziger, Co-founder and former Chairman of Solaria Corporation, USA*

Dare to Care, a collection of ideas and initiatives to change finance as we know it, is a platform for global citizens to work together and maneuver through the world economic and financial crisis. The ideas presented within - of changing our mindset from a money-first to a care-first attitude - are meant to stimulate thoughts about our current monetary system and economy and how we truly want them to function. Author Louis

Böhlingk presents a workable method for us to change the way we think and feel about money, using it instead to support our fellow man, the Earth, and the gifts we all receive through each other and our planet. Dare to Care stresses that with a care-first approach, money can support our efforts to create a better world without greed or fear of going without.

# blogothon

Reflections and Revelations from the News Dissector

By Danny Schechter

In just a decade, blogging changed from a fad to a phenomenon with an estimated 51 million participants, mostly creative citizens with something to say or express. Citizens who want to participate in media rather than be subjected to it. Blogothon is a selection of blogs and essays posted by raconteur par excellence, gadfly of the media, and "News Dissector" Danny Schechter in an award-winning daily blog that he began writing in 2000. In Blogothon Schechter demonstrates the importance of blogging as an alternative media in an age when mainstream media has come under increasing scrutiny for a lack of credibility, real news and social value. This

compilation of Schechter's blog posts describes the financial crisis developed during the first decade of the 21st century, the influence of activists such as Martin Luther King and Jesse Jackson on Occupy Wall Street, the ascent of Al Jazeera, the expulsion of Helen Thomas and Keith Olbermann from mainstream media, and increased partisanship and polarization in U.S. politics. Blogothon is a fascinating read for anyone interested in an authentic account of historic events still unfolding.

# earth fever

Living Consciously with Climate Change

By Judy McAllister, Erik Van Praag & Jan Paul Van Soest  
Introduction by Hazel Henderson

*"Links a crisp and clear explanation of the climate problem to a spiritual quest for solutions... Earth Fever is something special... Read it and subsequently do something." - Pierre de Winter, in Platform for Managers and Professionals*

The human species is in a rather precarious situation. Poverty, the energy and financial crises, and above all the challenge of climate change mean that our civilization has come to a dangerous edge. Our safety nets-on both collective and individual levels-have been removed. Can we create a future that allows for a dignified society and a peaceful world? With a change of consciousness and a new spirituality, we may. Authors Judy McAllister, Erik van Praag, and Jan Paul van Soest bring to bear their diverse experience in the fields of sustainability, leadership, and entrepreneurialism on the

challenge of building a radically different belief system about life such an endeavor will require. Along with the wisdom of international opinion leaders-including management consultant Peter Senge; Jeroen van der Veer, the former CEO of Royal Dutch Shell; cultural creative Paul Ray; Herman Wijffels, former governor at the World Bank; and others-Earth Fever delves into what is needed to bring about this essential new way of thinking.

# flying saucers over the white house

By Colin Bennett  
Introduction by Nick Pope

Colin Bennett has written several books, including *The Entertainment Bomb*, *Looking for Orthon*, and *Politics of the Imagination*, which won the Anomalist Award for Best Biography in 2002.

*Flying Saucers Over the White House* is the story of Captain Edward J. Ruppelt, a US Air Force officer who researched UFO sightings in the 1950s and made a concentrated effort to convince the United States Air Force that UFOs exist. Ruppelt, who coined the term 'UFO', headed "Project Blue Book," an assignment designed by the United States government to investigate and report on the existence of unidentified flying objects and their link to extraterrestrial beings. Ruppelt dissected the evidence, separating chance sightings of ordinary objects from true UFO sightings. He eventually wrote *The Report on Unidentified Flying Objects*, summarizing his findings. In *Flying Saucers Over the White House*, Bennett examines the life of this "founding father" of ufology, analyzing the evidence and the U.S. government's reporting of this phenomenon for a new generation of readers.

# celtic mysteries

*Windows to Another Dimension in America's Northeast*

By Philip Imbrogno  
and Marianne Horrigan

*"The book is a must read for anyone who is interested in the paranormal, UFOs, and ancient archeology. If you like a real life mystery, then this book will keep you enthralled from cover to cover." - Greenwich Time*

Centered in New York's Hudson River Valley are a series of mysterious stone chambers and carved standing megaliths that have perplexed researchers of the paranormal and archaeologist for decades. What are the strange carvings and language written on the chambers walls? Why are these structures built over areas of negative magnetic anomalies? Scientists and historians tend to write off these structures as colonial root cellars, but authors Philip Imbrogno and Marianne Horrigan, who have researched and studied the chambers for more than ten years, believe they are evidence that the East Coast of North America was explored by people from Europe centuries before Columbus. The ancient people who constructed these chambers may have been Druids who came to the new world in search of a gateway to the world of the gods.

# crash at corona

*The U.S. Military Retrieval and Cover-Up of a UFO*

*The Definitive Study of the Roswell Incident*

By Don Berliner  
and Stanton T. Friedman

*"One of the more credible books arguing the existence of UFOs...Most arresting of all is the testimony of those who handled the debris, who had no opportunity to compare notes, yet have described the materials ...in almost identical language." - Publishers Weekly*

*If UFOs don't exist, then they can't crash.* But something did crash near Corona, a tiny town not far from Roswell, New Mexico, in 1947. And that crash has been dissected and debated ever since. Aviation/science writer Don Berliner and nuclear physicist Stanton Friedman, the original civilian investigator of the so-called Roswell incident, have delved into the controversy to find the truth. They sifted through once-classified government documents, interviewed military and civilian witnesses, pieced together evidence, considered alternative theories, and concluded that a UFO crashed near Corona-and the U.S. government knew it and covered it up.

*Crash at Corona* proves that what was found in the New Mexico desert wasn't a weather balloon or a secret weapon-it was a UFO. DON BERLINER has written more than 300 magazine articles and 25 books on aviation history and space and was also a staff writer for the National Investigations Committee on Aerial Phenomena (NICAP).

# astrology and the art of healing

By A.T. Mann

*"This is the first time I have read about astro-health without going into hypochondria overdrive. The charts contains not only the astrological stories of health issues, but the seeds of their resolution through fascinating combinations of therapies."* - Journal of the Scottish Astrological Association

Conventional medicine treats symptoms with surgery and drugs rather than healing the root causes of illness. Complementary therapies attempt to address the whole self, which can raise awareness of and even counteract the imbalances that create disease. This book attempts to relate inner causes with our "four bodies" in order to affect healing. *Astrology and the Art of Healing* approaches healing and astrology in a new and revolutionary way. Physical, emotional, mental, and spiritual therapies relate to stages of your life process, from conception through birth, and from childhood to old age and death. Many horoscopes show how to understand the origins of health imbalances in your life. Correlations to appropriate therapies can support the expertise of your doctors. A free astro-chart is included.

# the perfect horoscope

By John Willner  
Foreword by Leigh Westin

John Willner, is a retired senior scientist who led state-of-the-art projects throughout his career. But well before receiving advanced engineering degrees and entering his chosen profession, he became a proficient astrologer. He successfully applied astrology to hiring professional employees, making important business decisions, selecting his marriage partner, and assisting other people who were aware of his involvement.

The majority of horoscopes in current use are terribly wrong. Why? Because spiritual birth times, which are essential to producing an accurate horoscope according to Edgar Cayce, occur up to four-and-a-half hours before physical birth. That difference leaves aspects between planets about the same, but shifts all house cusps backward by up to one or two signs. Compared with most of today's faulty horoscopes, these "perfect horoscopes" match personas with awesome precision and provide greatly enhanced forecasting capabilities. This revolutionary book on astrology shows you how to (1) arrive at spiritual birth times, (2) apply two other fundamentals of astrology currently omitted from most horoscopes, and (3) verify your now totally functional horoscope.

# WATER:

## The Blood of the Earth

Exploring Sustainable Water Management for the New Millennium

By Allerd Stikker

*"Allerd Stikker has always reminded me of Alexis de Tocqueville, who would have chosen to study the problem surrounding water rather than the American democracy. He has the same insatiable curiosity, the same energy, same passion, same ease in mixing analysis with intuition, the capacity to draw together different cultures, the same capacity to listen and to dialogue with those who reason from different starting blocks. "Water, the Blood of the Earth is the outcome of reflection and action of a cosmopolitan who has remained loyal to his native land, mixing some European thinking of the Age of Enlightenment with some futuristic viewpoints."*

-Charles Louis de Maudhuy, advisor to the chairman, Veolia Water

**"**"Lack of access to clean and sufficient water in many parts of the world, especially in Asia and Africa, will be a major issue in the coming decades." This book presents an overall view on the diversity of problems and solutions, based on the author's involvement in water-related projects. Over the course of the years I have followed some of these projects with interest; they inspire us to take concrete actions." -Antony Burgmans, former chairman, Unilever.

"In this book Allerd describes his convincing views on desalination solutions for local and urban clean water shortages as well as his deeply felt findings on the spiritual meanings of water, all assembled on a 20 years' journey on which I was lucky to travel along." -Leonor Lindner

**A**llerd Stikker is a retired industrialist with an engineering degree from Delft Technical University and a postgraduate degree in theology from Leeds University. He is chairman and founder of the Ecological Management Foundation ([www.emf.nl](http://www.emf.nl)), a nonprofit organization focusing on the ecological dimension in business strategy.
